# Solar series VSD

Himel Solar VSD is an innovative solution that uses solar power as a reliable energy source for pumping water. It allows to harness maximum solar energy to run the pump for maximum duration in a day by controlling the speed of the motor based on the power available from the solar panel.

Series	Voltage Class	Motor Capacity Table																								
		0.4	0.75	1.5	2.2	4	5.5	7.5	11	15	19	22	30	37	45	55	75	90	110	132	160	185	200	220	250	280
Solar	Single-phase 220V±15%																									
	Three-phase 380V±15%																									
Solar -SM	Single-phase 220V±15% To drive single phase motor																									

• 2S = 220V±15% Single Phase; 4T = 380V±15% Three Phase;

• SM= Drive Single Phase Motor

## Build-in MPPT

Maximum power point tracking ensures that you get the most power output possible from your solar panel and maximizes the performance of your pump throughout the day.

## Dual supply (AC & DC) capability

The VSD is customized to operate in dual supply mode, so the grid connected supply is used in the absence of energy from PV cells.

## Automatic start-run-stop through out the day

With water level detection in the tank and pump overload and under-load protection.

## Easy to use

- Compact design
- Easy to install with Din rail
- Can run with default setting, no parameter set need
- One-key recovery function

## Special program function

- Energy meter
- Flow calculation
- Support single phase motor water pump

## Pump-specific protection

- Dry run detection.
- Voltage limit
- Overvoltage , overcurrent, overload protection
- Phase-loss protection
- Short-circuit protection
